Notes

1. If your agency's brand fonts require special licensing, an open-source (free) substitute font will be used instead.

2. Requires your agency to set up a free Google Developer account, which includes up to 40,000 Google Maps Platform API calls (four SKUs, 10,000 calls each) per month at no cost. Your agency will be responsible for paying fees directly to Google for excess API calls, if any.

3. Realtime data is integrated using Swiftly API or with GTFS-RT feed(s) provided by your agency.
